The Centers for Medicare and Medicaid Services (CMS) and the National Center for Health Statistics (NCHS), two departments within the U.S. Federal Government’s Department of Health and Human Services (DHHS) provide the following guidelines for coding and reporting using the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM). These guidelines should be used as a companion document to the official version of the ICD-10-CM as published on the NCHS website. The ICD-10-CM is a morbidity classification published by the United States for classifying diagnoses and reason for visits in all health care settings. The ICD-10-CM is based on the ICD-10, the statistical classification of disease published by the World Health Organization (WHO).

These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS.

These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses and procedures that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

The term encounter is used for all settings, including hospital admissions. In the context of these guidelines, the term provider is used throughout the guidelines to mean physician or any qualified health care practitioner who is legally accountable for establishing the patient’s diagnosis. Only this set of guidelines, approved by the Cooperating Parties, is official.

The guidelines are organized into sections. Section I includes the structure and conventions of the classification and general guidelines that apply to the entire classification, and chapter-specific guidelines that correspond to the chapters as they are arranged in the classification. Section II includes guidelines for selection of principal diagnosis for non-outpatient settings. Section III includes guidelines for reporting additional diagnoses in non-outpatient settings. Section IV is for outpatient coding and reporting. It is necessary to review all sections of the guidelines to fully understand all of the rules and instructions needed to code properly.
ICD-10-CM Official Guidelines for Coding and Reporting ................................................................. 1

Section I. Conventions, general coding guidelines and chapter specific guidelines ......................... 7

A. Conventions for the ICD-10-CM .................................................................................................... 7
   1. The Alphabetic Index and Tabular List ....................................................................................... 7
   2. Format and Structure: .............................................................................................................. 7
   3. Use of codes for reporting purposes ....................................................................................... 7
   4. Placeholder character .............................................................................................................. 7
   5. 7th Characters .......................................................................................................................... 8
   6. Abbreviations .......................................................................................................................... 8
      a. Alphabetic Index abbreviations ............................................................................................ 8
      b. Tabular List abbreviations .................................................................................................... 8
   7. Punctuation ............................................................................................................................. 8
   8. Use of “and” ............................................................................................................................ 9
   9. Other and Unspecified codes .................................................................................................. 9
      a. “Other” codes ....................................................................................................................... 9
      b. “Unspecified” codes ............................................................................................................. 9
   10. Includes Notes ....................................................................................................................... 9
   11. Inclusion terms ....................................................................................................................... 9
   12. Excludes Notes ....................................................................................................................... 9
      a. Excludes1 ............................................................................................................................. 9
      b. Excludes2 ............................................................................................................................ 10
   13. Etiology/manifestation convention (“code first”, “use additional code” and “in diseases classified elsewhere” notes) ....................................................................................................................... 10
   14. “And” ..................................................................................................................................... 11
   15. “With” ................................................................................................................................... 11
   16. “See” and “See Also” ............................................................................................................ 11
   17. “Code also note” .................................................................................................................. 11
   18. Default codes ....................................................................................................................... 11

B. General Coding Guidelines ........................................................................................................... 12
   1. Locating a code in the ICD-10-CM ......................................................................................... 12
   2. Level of Detail in Coding ......................................................................................................... 12
   3. Code or codes from A00.0 through T88.9, Z00-Z99.8 ............................................................ 12
   4. Signs and symptoms ............................................................................................................... 12
   5. Conditions that are an integral part of a disease process ....................................................... 13
   6. Conditions that are not an integral part of a disease process ............................................... 13
   7. Multiple coding for a single condition ................................................................................... 13
   8. Acute and Chronic Conditions ............................................................................................... 13
   9. Combination Code ................................................................................................................... 14
   10. Sequela (Late Effects) ............................................................................................................ 14
   11. Impending or Threatened Condition .................................................................................... 14
   12. Reporting Same Diagnosis Code More than Once ............................................................... 15
   13. Laterality ................................................................................................................................. 15
   14. Documentation for BMI and Pressure Ulcer Stages .............................................................. 15
   15. Syndromes ............................................................................................................................. 15
   16. Documentation of Complications of Care ............................................................................ 15

C. Chapter-Specific Coding Guidelines ............................................................................................. 16
   1. Chapter 1: Certain Infectious and Parasitic Diseases (A00-B99) ............................................. 16
a. Human Immunodeficiency Virus (HIV) Infections ................................................................. 16
b. Infectious agents as the cause of diseases classified to other chapters .......................... 18
c. Infections resistant to antibiotics ....................................................................................... 18
d. Sepsis, Severe Sepsis, and Septic Shock ......................................................................... 19
e. Methicillin Resistant Staphylococcus aureus (MRSA) Conditions .................................... 22

2. Chapter 2: Neoplasms (C00-D49) .................................................................................. 24
   a. Treatment directed at the malignancy .............................................................................. 25
   b. Treatment of secondary site ......................................................................................... 25
c. Coding and sequencing of complications ...................................................................... 25
d. Primary malignancy previously excised ......................................................................... 26
e. Admissions/Encounters involving chemotherapy, immunotherapy and radiation therapy .. 26
f. Admission/encounter to determine extent of malignancy .............................................. 27
g. Symptoms, signs, and abnormal findings listed in Chapter 18 associated with neoplasms . 27
h. Admission/encounter for pain control/management ..................................................... 27
i. Malignancy in two or more noncontiguous sites ............................................................ 28
j. Disseminated malignant neoplasm, unspecified ............................................................. 28
k. Malignant neoplasm without specification of site .......................................................... 28
l. Sequencing of neoplasm codes ....................................................................................... 28
m. Current malignancy versus personal history of malignancy ........................................ 29
n. Leukemia, Multiple Myeloma, and Malignant Plasma Cell Neoplasms in remission versus personal history........................................................................................................... 30
   o. Aftercare following surgery for neoplasm ................................................................... 30
   p. Follow-up care for completed treatment of a malignancy .......................................... 30
   q. Prophylactic organ removal for prevention of malignancy .................................... 30
   r. Malignant neoplasm associated with transplanted organ .......................................... 30

3. Chapter 3: Disease of the blood and blood-forming organs and certain disorders involving the immune mechanism (D50-D89) .......................................................... 31

4. Chapter 4: Endocrine, Nutritional, and Metabolic Diseases (E00-E89) ............................ 31
   a. Diabetes mellitus .......................................................................................................... 31

5. Chapter 5: Mental, Behavioral and Neurodevelopmental disorders (F01 – F99) ............... 33
   a. Pain disorders related to psychological factors ............................................................ 33
   b. Mental and behavioral disorders due to psychoactive substance use ............................ 33

6. Chapter 6: Diseases of the Nervous System (G00-G99) .................................................... 34
   a. Dominant/nondominant side ....................................................................................... 34
   b. Pain - Category G89 .................................................................................................... 35

7. Chapter 7: Diseases of the Eye and Adnexa (H00-H59) .................................................... 38
   a. Glaucoma ..................................................................................................................... 38

8. Chapter 8: Diseases of the Ear and Mastoid Process (H60-H95) ....................................... 39

9. Chapter 9: Diseases of the Circulatory System (I00-I99) ................................................... 40
   a. Hypertension ............................................................................................................... 40
   b. Atherosclerotic Coronary Artery Disease and Angina .............................................. 42
   c. Intraoperative and Postprocedural Cerebrovascular Accident ................................... 42
   d. Sequelae of Cerebrovascular Disease ...................................................................... 43
   e. Acute myocardial infarction (AMI) ............................................................................ 43

10. Chapter 10: Diseases of the Respiratory System (J00-J99) ................................................ 44
    a. Chronic Obstructive Pulmonary Disease [COPD] and Asthma .................................. 44
    b. Acute Respiratory Failure .......................................................................................... 45
c. Influenza due to certain identified influenza viruses .................................................. 45
d. Ventilator associated Pneumonia ................................................................................. 46
11. Chapter 11: Diseases of the Digestive System (K00-K93) ........................................... 46
12. Chapter 12: Diseases of the Skin and Subcutaneous Tissue (L00-L99) ..................... 47
   a. Pressure ulcer stage codes ....................................................................................... 47
13. Chapter 13: Diseases of the Musculoskeletal System and Connective Tissue (M00-M99) 48
   a. Site and laterality ...................................................................................................... 48
   b. Acute traumatic versus chronic or recurrent musculoskeletal conditions ............ 48
   c. Coding of Pathologic Fractures .............................................................................. 49
   d. Osteoporosis .......................................................................................................... 49
14. Chapter 14: Diseases of the Genitourinary System (N00-N99) ................................. 50
   a. Chronic kidney disease .......................................................................................... 50
15. Chapter 15: Pregnancy, Childbirth, and the Puerperium (O00-O9A) ......................... 51
   a. General Rules for Obstetric Cases ....................................................................... 51
   b. Selection of OB Principal or First-listed Diagnosis .............................................. 52
   c. Pre-existing conditions versus conditions due to the pregnancy ......................... 53
   d. Pre-existing hypertension in pregnancy ................................................................ 54
   e. Fetal Conditions Affecting the Management of the Mother .................................. 54
   f. HIV Infection in Pregnancy, Childbirth and the Puerperium ............................... 54
   g. Diabetes mellitus in pregnancy ............................................................................. 55
   h. Long term use of insulin ......................................................................................... 55
   i. Gestational (pregnancy induced) diabetes .............................................................. 55
   j. Sepsis and septic shock complicating abortion, pregnancy, childbirth and the puerperium 55
   k. Puerperal sepsis ..................................................................................................... 56
   l. Alcohol and tobacco use during pregnancy, childbirth and the puerperium ............ 56
   m. Poisoning, toxic effects, adverse effects and underdosing in a pregnant patient .... 56
   n. Normal Delivery, Code O80 ................................................................................ 57
   o. The Peripartum and Postpartum Periods .............................................................. 57
   p. Code O94, Sequelae of complication of pregnancy, childbirth, and the puerperium 58
   q. Abortions ............................................................................................................... 58
   r. Abuse in a pregnant patient ..................................................................................... 59
16. Chapter 16: Certain Conditions Originating in the Perinatal Period (P00-P96) ........... 59
   a. General Perinatal Rules ........................................................................................ 59
   b. Observation and Evaluation of Newborns for Suspected Conditions not Found .... 60
   c. Coding Additional Perinatal Diagnoses .................................................................. 61
   d. Prematurity and Fetal Growth Retardation .......................................................... 61
   e. Low birth weight and immaturity status ............................................................... 61
   f. Bacterial Sepsis of Newborn .................................................................................. 62
   g. Stillbirth .................................................................................................................. 62
17. Chapter 17: Congenital malformations, deformations, and chromosomal abnormalities (Q00-Q99) 62
18. Chapter 18: Symptoms, signs, and abnormal clinical and laboratory findings, not elsewhere classified (R00-R99) ................................................................. 63
   a. Use of symptom codes .......................................................................................... 63
   b. Use of a symptom code with a definitive diagnosis code ...................................... 63
   c. Combination codes that include symptoms .......................................................... 63
   d. Repeated falls ........................................................................................................ 63
Section II. Selection of Principal Diagnosis

A. Codes for symptoms, signs, and ill-defined conditions

B. Two or more interrelated conditions, each potentially meeting the definition for principal diagnosis

C. Two or more diagnoses that equally meet the definition for principal diagnosis

D. Two or more comparative or contrasting conditions

E. A symptom(s) followed by contrasting/comparative diagnoses

F. Original treatment plan not carried out

G. Complications of surgery and other medical care

H. Uncertain Diagnosis

I. Admission from Observation Unit
   1. Admission Following Medical Observation
   2. Admission Following Post-Operative Observation

J. Admission from Outpatient Surgery

Section III. Reporting Additional Diagnoses

A. Previous conditions

B. Abnormal findings

C. Uncertain Diagnosis
Section IV. Diagnostic Coding and Reporting Guidelines for Outpatient Services

A. Selection of first-listed condition
   1. Outpatient Surgery
   2. Observation Stay

B. Codes from A00.0 through T88.9, Z00-Z99

C. Accurate reporting of ICD-10-CM diagnosis codes

D. Codes that describe symptoms and signs

E. Encounters for circumstances other than a disease or injury

F. Level of Detail in Coding
   1. ICD-10-CM codes with 3, 4, 5, 6 or 7 characters
   2. Use of full number of characters required for a code

G. ICD-10-CM code for the diagnosis, condition, problem, or other reason for encounter/visit

H. Uncertain diagnosis

I. Chronic diseases

J. Code all documented conditions that coexist

K. Patients receiving diagnostic services only

L. Patients receiving therapeutic services only

M. Patients receiving preoperative evaluations only

N. Ambulatory surgery

O. Routine outpatient prenatal visits

P. Encounters for general medical examinations with abnormal findings

Q. Encounters for routine health screenings

Appendix I

Present on Admission Reporting Guidelines
