Accessing ALEKS for
Math 010 – Arithmetic and Algebra Review

Math 010 is a computer-mediated course that uses a web-based program called ALEKS. All Math 010 students must purchase a Student Access Code and, on the first day of class, will register with ALEKS.

STEP 1: Purchase a Student Access Code.

Option 1: Must be completed BEFORE the first day of class
Purchase an ALEKS User Guide at the TCC Bookstore.
Cost: Approximately $40 for 6 weeks (price subject to change)
At the back of the User Guide you will find an individual Student Access Code, good for 6 weeks after registering with ALEKS (see below).

Option 2: Must be completed ON the first day of class
Purchase access directly from ALEKS using a credit or debit card.
Cost: Approximately $30 for 6 weeks (price subject to change)
On the first day of class, bring a credit or debit card that you can use to purchase your Student Access Code online directly from ALEKS. You will purchase the Student Access code as part of your Registration process.

STEP 2: On the first day of class Register with ALEKS.

On the first day of class you will register with ALEKS by logging onto <http://www.aleks.com>. Click on the link in the top left corner that says, “New User? REGISTER NOW!” Your instructor will give you a Course Code on the first day of class, and you will be asked to supply your Student Access Code and other information as part of the registration process.

Students who have not purchased a Student Access Code will NOT be able to begin their course of studies in Math 10. Please be prepared on the first day of class!
