Are you interested in robotics?
Would you like to compete with Sumo Bots?
Would you like to get credit for building a robot project?
What are Sumo Bots?
I’m interested, but who should I contact?

Yes? Well, Engineering Club is looking for students who would be interested in Sumo Bots and in competing against other sumo bot teams.

You can join ENGR 299 class to get credit for building the sumo bot.

Sumo Bots are programmable robots that are used in Robot-Sumo competitions where two robots attempt to push each other out of a circle.

To join this awesome project, simply come to an Engineering Club meeting (Every Wednesday 3-4:30pm B15-223L) or email Greidi Ajalik (gajalik@tacomacc.edu) for more information.
