Information regarding the core themes and core indicators:

Core themes are mission-based institutional goals. TCC measures its effectiveness toward reaching these goals by assessing indicators organized under each core theme. These measurements are TCC's core indicators and reflect the core values of our institutional mission.

Mission fulfillment targets for the core indicators reflect the institution's aspirations toward meeting its goals. Mission fulfillment targets are established for each indicator by TCC's Leadership Team and are monitored annually.

Each year the TCC community receives a report of the College's progress toward achieving its institutional goals as measured by its success in meeting mission fulfillment targets of the core indicators. This core indicator report is used at the unit level in annual academic program planning and administrative unit planning which occur at the institutional level in the operational and budgetary planning which occur in the spring.

Core indicators which fall below mission fulfillment targets are analyzed and appropriate action plans developed to improve future performance. The annual core indicator report provides the college community with data to monitor and advance TCC's performance relative to its stated mission. The core indicators are a six-year (2019/20 - 2024/25) commitment to institutional improvement and are foundational to TCC's continuous improvement planning activities and its iterative cycle of institutional assessment-planning-action-assessment. The core indicators are complimented by diverse data sets which include assorted TCC data dashboards, survey results, Integrated Postsecondary Education Data System (IPEDS), and Washington State Board for Community and Technical Colleges (SBCTC) data.
