Workforce Education Funding

- **Purpose of Grants:** Workforce Education Grants are not intended to cover the entire cost of a degree. They are designed to provide start-up and fill-in-gap assistance for specific needs related to education and training.
- **Case-by-Case Basis:** Funding assistance for tuition and required textbooks is provided on a case-by-case basis, contingent upon the availability of funds and the identification of a funding gap. This emphasizes that not all students may receive this assistance.
- **Quarterly Determination:** The allocation of funds for subsequent quarters is not guaranteed. Each quarter's funding is assessed independently, and students should not assume ongoing support beyond the current quarter.
- **Request for Funding:** To be considered for workforce funding, students must request funding for each quarter. This ensures that students actively communicate their needs and allows for a more flexible approach to disbursement.

Note: Please be aware that the Workforce Education Grants are not designed to pay for entire degrees. Students who are eligible for Workforce Education Grants may get first-quarter funding assistance to cover tuition and/or required textbooks on a case-by-case basis if funds are available and a gap in funding is identified. Funding for subsequent quarters is determined on a quarter-by-quarter basis and is not guaranteed. If you would like to be considered for the Workforce funding you must request funding every quarter.
