To ensure the safety and health of our college community, TCC will continue to take a series of actions in response to the ongoing COVID-19 public health crisis.

Our decisions continue to be informed by the Tacoma-Pierce County Health Department (TPCHD), the Centers for Disease Control and Prevention (CDC) and other public health best practices. We also partner with the State Board for Community and Technical Colleges, work closely with other public higher education leadership and take direction from Gov. Jay Inslee. Our goals continue to be:

- Protect the health and safety of students, staff and the community.
- Adhere to the guidance of public health experts, State and federal government and state mandates.
- Provide ongoing communications to students, staff and the public.
- Support students and staff in the transition to online instruction and working remotely.
- Ensure equitable access to instruction, technology and other resources for student success.
- Plan for the future of TCC while ensuring the safety of our community.

Got questions? The FAQs are updated frequently and are featured on the toolkit website. Visit here for updated information.

On campus?

Make sure you have a **MASK**

**MASKING DOs**

- Completely cover your nose and mouth
- A nose wire prevents air from leaking out of the top of the mask
- Fit snugly against the sides of your face and don’t have gaps
- Two or more layers of washable, breathable fabric

Name badges are required on campus. This tells us you have self-attested your vaccination status or received an approved exemption.

- Forgot your badge? Check in at Bldg. 14 and get a wrist band.
- Lost your badge? Pick one up at Bldg. 14.

Do not choose masks that:

- Are made of fabric that makes it hard to breathe, like vinyl
- Have exhalation valves or vents that allow virus particles to escape

Face shields + mask are OK

Face shields only is NOT recommended
Masks and Compliance

Everyone on campus is required to wear masks indoors and outdoors, regardless of vaccination status. This includes parking lots.

Mask stations will be placed at all buildings on the campuses.
If you need more masks, please call Campus Public Safety at 253.566.5111.

MASK GUIDELINES:

• All individuals on campus are expected to wear masks indoors unless working alone in a private workspace, but a mask must be kept close and put on if someone enters the workspace, even if social distance is maintained.
• Masks must be worn outdoors.
• Wear your mask until you are ready to eat and then place it back on afterwards. Staff are encouraged to eat in their office area or outside. Maintain social distancing in breakrooms or shared spaces. Eating or drinking in classes is not permitted.
• You have every right to ask a student or employee to wear a mask in any setting or ask them to correct their mask placement on their face. You can make it clear this is college policy and state law.
• Review the CDC guidelines of what is an acceptable mask.

COMPLIANCE

• Health monitors (new employees who will be stationed in key areas around the campus) will help with providing masks, ensuring mask compliance, helping with check-ins for visitors, restocking supplies and more.
• Please offer a mask to any individual who is unmasked before providing them with services. If they refuse to wear a mask, direct them to services that can be conducted virtually via Zoom, phone or email. Services will not be provided to those who are unmasked.
• If the unmasked visitor refuses to leave and conduct their business virtually, contact Campus Safety to escort the unmasked visitor off campus: 253.566.5111.
• If a student or an employee refuses to wear their mask, employees are encouraged to remind them that masking is a condition of attendance or employment at TCC and they may be subject to removal from campus or face disciplinary action if they do not comply. If the individual continues to refuse, contact Campus Safety: 253.566.5111.
As TCC’s campuses phase back into in-person operations, classrooms will need to adjust to ensure the safety of both employees and students.

- Masks are required for all. Mask stations will be located in most buildings. Health monitors will assist with masks. If a student needs accommodation regarding a mask, please contact Access Services at access@tacomacc.edu.

- Disinfection wipes will be available in all classrooms to maintain a hygienic atmosphere. CDC has reported that in most situations, the risk of infection from touching a surface is low. The most reliable way to prevent infection is regularly wash hands. For general sanitation, we encourage faculty and students to use the wipes after each use. Facilities will clean the areas daily. If you need more wipes, call Campus Safety at 253.566.5111.

COMMUNICATING TO STUDENTS

- Faculty are encouraged to provide TCC’s safety protocols in their syllabi, course resources in Canvas or other ways you communicate to students and reinforce these protocols during the first day of class.

- Suggested syllabus language:
  “TCC has implemented safety protocols based on guidance from public health agencies. This includes wearing a mask at all times; wash hands; and self-attest your vaccination status. As a member of our campus community, students, faculty, and staff are expected to follow all health and safety protocols and policies. These protocols apply to everyone who physically enter the campus grounds. TCC is committed to protecting the health and safety of the campus community. By participating in this course, you agree to abide by TCC’s ongoing safety protocols.”

- Clearly communicate your preference of how you wish to interact with students. Faculty can choose to meet with students in-person; via Zoom or Teams or phone. As long as you follow TCC safety protocols of masking and self-attestation, it is up to the faculty member and their own comfort levels. Also work with students about their preference, too, such as small group setting or one-on-one meetings.

DIGITAL ACCESS TO CLASSES

Faculty are encouraged to adopt a method of recording class sessions through Zoom, Microsoft Teams, Panopto, or other means. Having a method of digital access will ensure that students who are required to quarantine and miss in-person classes do not fall behind in coursework.

Support can be provided by TCC’s eLearning team – find information here.
VACCINATIONS

Vaccine Information and Exemptions

Vaccinations are an essential tool in battling the COVID-19 pandemic. Per Gov. Jay Inslee’s higher education proclamation 20-12, TCC opted to be a fully vaccinated campus this summer. This means staff, faculty and students are required to be fully vaccinated against COVID-19 and self-attest their vaccination status. Only medical and religious exemptions will be considered for winter quarter.

As a condition of employment, all higher education employees must be fully vaccinated by Oct. 18.

TCC students must self-attest their vaccination status or received an approved medical or religious exemption. Students who choose not to self-attest can only attend online classes and will need to check-in at Building 14 if on campus for services.

See updated vaccination and Covid-19 case numbers on our dashboard at tacomacc.edu.

EMPLOYEE VACCINATION OR EXEMPTION ATTESTATION

Employees must submit a self-attestation form to verify their vaccine status through ctcLink. Employees should submit this information as soon as they have completed both doses of the Moderna or Pfizer vaccine, or after their first and only dose of the Johnson & Johnson vaccine.

Employees may submit exemptions for legitimate medical reasons and sincerely held religious beliefs.

Employees claiming exemptions will also need to complete the self-attestation form through ctcLink.

New employees will be required to self-attest their status. Instructions on how to complete the self-attestation form can be found here.

EMPLOYEE VERIFICATION PROCESS

TCC is required to verify proof of vaccination for employees. Human Resources, under the guidance of our legal counsel, has developed a process to verify authentic vaccine cards. Another process has been developed to review medical and religious documentation. No documentation will be kept for records.

STUDENT VACCINATION OR EXEMPTION ATTESTATION

Students must submit a self-attestation form to verify their vaccine status through ctcLink as soon as they have completed both doses of the Moderna or Pfizer vaccine, or after their first and only dose of the Johnson & Johnson vaccine.

Students may submit exemptions for legitimate medical reasons and sincerely held religious beliefs. Students claiming exemptions will also need to complete the self-attestation form through ctcLink.

Students who do not self-attest can only enroll in online classes. If they come onto campus for any type of service, they must check in at Building 14.

Instructions on how to complete the self-attestation form can be found here.

WINTER QUARTER

For winter quarter, students who are enrolled in on-campus classes or plan to participate in any on-campus activities and/or services must self-attest their vaccination status or receive an approved religious or medical exemption.

Students enrolled in on-campus classes who have not self-attested by the Dec. 27 deadline will be removed from their on-campus classes for winter quarter.

Students who are taking exclusively online classes will not be required to self-attest.

Students can self-attest anytime - it goes into effect within an hour. It is good for the academic year.

Version 12/22/2021
COVID-19 Symptoms

Before you leave for work, assess your health. How do you feel? Do you have any symptoms of COVID-19? Symptoms vary, and are updated by the CDC, but the most common are:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

There is additional information about COVID-19 at the Tacoma-Pierce County Health Department website: https://www.tpchd.org/healthy-people/human-coronavirus

WHAT TO DO:

- Stay home if you are experiencing any COVID-19 related symptoms.
- Notify your supervisor right away. If you would like to work from home, please ask your supervisor.
- Seek medical advice about whether or not you need to be tested for COVID-19.
- Refer to TCC’s flowchart about how to handle symptoms: https://tacomacc.edu/_attachments/covid-19/covidfinalflowchart.pdf

COVID-19 Contact Tracing at TCC

Employees must self-report immediately to their supervisor if they develop symptoms of, were exposed to, or test positive for COVID-19.

To report a confirmed positive case:

- Contact Wayne Mask of Administrative Services at wmask@tacomacc.edu or 253.566.5051 to self-report and initiate the contact tracing process. All information shared will remain confidential.
- For employee-related questions, contact Shawn McRavin of Human Resources at smcravin@tacomacc.edu or 253.566.5374. She can provide additional information about available leave and other resources.
- The Tacoma-Pierce County Health Department will be contacted for support, if necessary.

STUDENT CASES

If a faculty member has a student who has been exposed or tested positive for COVID-19 in their classroom, please contact Wayne Mask at wmask@tacomacc.edu or 253.566.5051 to initiate the contact tracing process. Students should report if they are positive to their faculty instructors.

What happens if there is a positive case in a classroom or work setting?

These are the general guidelines:

- The employee or student should be sent home and referred for medical treatment.
- Contact Facilities for the area to be cleaned.

- Individuals who have been identified as having close contact (within six feet for a cumulative 15 minutes or more of contact) will be notified and advised the following:
  - Vaccinated individuals:
    Should be tested five to seven days following the date of the exposure and continue to wear a mask at all times until they receive a negative test result. They should watch for symptoms. If there are no symptoms, vaccinated people do not need to quarantine or be restricted from work following an exposure, if they follow the masking and testing recommendations. If positive, isolate for 10 days after the exposure date or at the onset of symptoms.
  - Non-vaccinated individuals:
    - Quarantine for 10 days after your last contact with a person who has COVID-19.
    - Watch for fever (100.4°F), cough, shortness of breath, or other symptoms of COVID-19.
    - If possible, stay away from people you live with, especially people who are at higher risk for getting very sick from COVID-19. Watch for symptoms until 14 days after exposure.
POSITIVE TEST

I think or know I had COVID-19, and I had symptoms
You can be around others after:
» 10 days since symptoms first appeared and
» 24 hours with no fever without the use of fever-reducing medications and
» Other symptoms of COVID-19 are improving*

*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation

I tested positive for COVID-19 but had no symptoms
If you continue to have no symptoms, you can be with others after 10 days have passed since you had a positive viral test for COVID-19.

If you develop symptoms after testing positive, follow the guidance above for “I think or know I had COVID-19, and I had symptoms.”

FURTHER ACTIONS

AND COMMUNICATIONS

For the workspace and classrooms, the general guidelines listed above would apply. Faculty and staff are recommended to contact Wayne Mask, who will provide directions about what actions to take, whether to get tested, quarantine and/or stay home. Examples:

• If a student is confirmed positive and was sitting within six feet of other students for 15 or more minutes, than those students would be notified. It is not required to notify the entire class about an exposure - only those who were in close contact. However, if the faculty member decides it’s necessary, please work with TCC Communications for guidance.

• In the workspace, if an employee comes into work sick, leaves and tests positive for COVID, the supervisor will be asked to help collect contact tracing information, such as who was in close contact with the individual. Supervisor will assist with notifying those who were in close contact. It is not required to notify the entire department about an exposure - only those who were in close contact. However, if the supervisor decides it’s necessary, please work with TCC Communications for guidance.

Wayne Mask will work with the TCC PIO and the Health Department if there is an outbreak (two or more positive cases in a setting) and will guide the communications and further actions, if necessary.

TCC employees and their family members have access to the Employee Assistance Program (EAP) for free and confidential licensed mental health counselling. EAP is a resource to provide guidance on both personal and work-related issues, among other services including free online workshops.

Visit eap.wa.gov/worklife (org code: TCC) or call 888.728.1408 for more information.

Supervisors and Human Resources are encouraged to support employees as they transition back into the workplace or express other mental health obstacles.

For students, free and confidential counseling is available through TCC’s counseling department. TCC’s professionally trained counseling team is available for remote sessions to help students navigate obstacles in college and life. Book an appointment or find more information at https://www.tacomacc.edu/tcc-life/life-resources/counseling.

COMBATTING COVID-19 TASK FORCE

This task force, led by Sonja Morgan, Jill Edwards and Tamyra Howser, provides guidelines and recommendations to the college about Covid-19 issues. The task force also addresses social and emotional needs of the college and how to best support members. Please contact the three chairs if you have a question or suggestion.
Reminders

- Stay home if you are ill – even if you are not experiencing COVID symptoms.
- Masks are required at all times on-campus.
- Wash your hands – the chance of contracting COVID from surfaces are low – but the CDC recommends handwashing to be an effective tool.
- Because TCC is a fully vaccinated college, we are not required to mandate social distancing. However, those who wish to practice social distancing are welcomed to do so.
- Follow the reliable news from the CDC and the Tacoma-Pierce County Health Department about the pandemic.
- TCC will keep its Safe Start page updated – read this page for news and updates. It’s important to be engaged!
- TCC offers free vaccination clinics to our community. Visit tacomacc.edu for dates and schedules.

ADDITIONAL INFORMATION

- Visitors to the Tacoma campus must go to Building 14 and fill out the health check form. Employees and students are no longer required to fill out the health check form or to complete the weekly safety training.
- If you plan to hold a gathering of more than 50 people, you need to obtain permission from the college president. Please work with your supervisor or club advisor to submit a request.
- Athletics has its own safety protocols. Contact Athletic Director Jason Prenovost for questions.

ADDITIONAL RESOURCES

Visit the following links for more information:
- TCC’s Safe Start Plan
- Vaccine clinics
- Tacoma-Pierce County Health Department website

Faculty Librarian Melissa Adams has collected a series of short, informative videos that explain the science behind vaccinations, debunk myths and provide resources for students during this time. Please encourage students to watch. Visit the Covid Info page.
What to do if a person is symptomatic?*

*If you have any symptoms, stay home.

If a person has one or more of these symptoms:

- Fever $\geq 100.4^\circ F$ or chills
- Shortness of breath or difficulty breathing
- Muscle or body aches
- New loss of taste or smell
- Cough (new, changed, or worsening)

**ISOLATE AT HOME**

**GET TESTED** for COVID-19

If they **CHOOSE NOT TO GET TESTED**

They test **POSITIVE** for COVID-19

**ISOLATE AT HOME**

If they test **NEGATIVE** for COVID-19

**IDENTIFY CLOSE CONTACTS**

See Section 2 and follow COVID-19 Contact Tracing protocols

**VACCINATED? RETURN TO CLASS**

Return if:
1. No fever within the past 24 hours (without medication) and
2. Symptoms have significantly improved

**UNVACCINATED?**

If they are not vaccinated but test negative, they can still return to class, as long as they meet (1) and (2). This is because they are not a close contact.

If a person has one or more of these symptoms:

- Congestion or runny nose
- Nausea, vomiting, or diarrhea
- Headache
- Fatigue
- Sore throat

**ISOLATE AT HOME**

Was only ONE symptom present?

- NO
- YES

Did the symptom resolve within 24 hours OR are they consistent with a diagnosed chronic illness?

- NO
- YES

Are they a known close contact?

- NO
- YES

Return after 10 days have passed since symptoms first appeared if:
1. No fever within the past 24 hours (without medication)
   AND
2. Symptoms have significantly improved

See Section 2 and follow COVID-19 Contact Tracing protocols

Information from: Washington State Department of Health and Centers for Disease Control and Prevention. To request in a different language, contact Dynamic Languages. [Nov. 22, 2021]
Identify and Care for COVID-19 Close Contacts at TCC

Close contacts are defined as being within six feet of a positive COVID-19 case for a cumulative 15 minutes over a 24 hour period.

Is the close contact vaccinated?

- NO
- YES

Do they have symptoms?

- NO
- YES

REMAIN at TCC

No need to quarantine but they should:
1. Get tested
2. Continue wearing a mask in all public indoor settings
3. Watch for symptoms for 14 days after close contact

TEST for COVID-19

- They test NEGATIVE for COVID-19
- They test POSITIVE for COVID-19 or do not get tested

ISOLATE at home

Can return to TCC after 10 days have passed since symptoms first appeared if:
1. No fever within the past 24 hours (without medication)
2. Symptoms have significantly improved

RETURN to TCC

Can return to TCC if:
1. No fever within the past 24 hours (without medication)
AND
2. Symptoms have significantly improved

TEST for COVID-19

- They test NEGATIVE for COVID-19

QUARANTINE at home

Quarantine at home for minimum of 10 days and up to 14 days

Information from: Washington State Department of Health and Centers for Disease Control and Prevention. To request in a different language, contact Dynamic Languages. [Nov. 22, 2021]
COVID-19 Contact Tracing Checklist at TCC

1. Staff members (Instructor, Dean or Supervisor) report a positive confirmed case to Wayne Mask.

2. Wayne will assign the case to one of the response team members:
   - Melissa McCarthy, Rachel Payne, Lisa Korby, Katy Ray, Tamyra Howser
   - Shawn McRavin to provide HR support for employees who are affected

3. Team member will contact the staff member to begin contact tracing process to determine the following:
   - Time and date and location of exposure
   - When to get tested
     (as of November 2021, current recommendation is 5-7 days after exposure)
   - Vaccination status
   - Work with staff member to determine contagious period of the case
   - Identify and contact close contacts with instructions (see toolkit for details) of next steps regarding the need to test, quarantine or isolate.
   - Work with Deans and/or supervisor to determine next steps with classroom and/or workplace operations.
   - Work with Communications team to determine what message to share with students/employees, if necessary.
   - Team member to track close contacts’ status and record case in tracking spreadsheet

4. Upon agreement by all parties, team member to close case.

*If there are two cases or more that emerges in the same area, this may be considered an outbreak. Contact PIO and TPCHD.

Definitions:
Close contact: Anyone within six feet for 15 minutes cumulative time of a positive case over 24 hours in a 24-hour time period.
Quarantine: You quarantine for a minimum of 10 days and up to 14 days per CDC guidelines.
Isolate: You isolate for 10 days after you have been infected with the virus.
Read here for more information about quarantine vs. isolation.

For TCC information about Covid-19, visit:
- The Safe Re-Opening Plan
- Return to Campus Toolkit
- Safe Start and Vax Requirements

Two additional resources:
- What to do if you test positive for COVID-19
- What to do if you were potentially exposed to someone with COVID-19
